# Analysis and Information (A&I) SSDQ Dashboard

2020 Transportation Research Board 99<sup>th</sup> Annual Meeting  
Federal Motor Carrier Safety Administration  
Analysis, Research, and Technology Forum  
January 14, 2020

# Data Quality Program

- Refocused our efforts to improve timely outreach and improve transparency.
- Made changes and additions to the State Safety Data Quality (SSDQ) performance measures.
  - Focus on uploads instead of when events occurred.
  - Earlier identification of issues.
  - New measure for Crash: VIN Accuracy.
  - Reports identify non-conforming records for improvement.
  - Move to Tableau to tell our story.

# Dashboards within a Measure

Your rating is GOOD

Current Measure

98%

● Leading Indicator 34%

Good (100-90)

Fair (89-65)

Poor (64-0)

98% of your State's evaluated crash records were reported within 90 days of the crash. These crashes were first uploaded 09/01/2018 and 08/31/2019. Your rating is good because your percentage is greater than or equal to 90%. [Learn how it was calculated.](#)

## What to do next

Make sure that you understand this measure and your State's rating.

- You can use the dashboard below to view the measure, leading indicator, and dig deeper into the data behind each measure. Select a data point on any of the tables below to learn more about that month's data.
- Hover over the Dashboard Help icon for additional information.
