

## FINANCIAL RESPONSIBILITY REQUIREMENTS

Regulations covering the minimum levels of financial responsibility (insurance) are found in 49 CFR Part 387, Subpart B. For-hire motor carriers operating any vehicle with a seating capacity of 15 passengers or less in interstate commerce are required to have \$1,500,000 in public liability insurance. A for-hire motor carrier of passengers is a company engaged in the transportation of passengers for compensation. Minimum levels of financial responsibility are determined by highest seating capacity of any vehicle operated by an interstate for-hire motor carrier of passengers.

The financial responsibility requirements do **not** apply to:

- A motor vehicle providing taxicab service and having a seating capacity of less than 7 passengers and not operated on a regular route or between specified points; or
- A motor vehicle carrying less than 16 people in a single daily round trip commuting to and from work.

## OPERATING AUTHORITY REGISTRATION REQUIREMENTS

A for-hire passenger carrier is a company that provides transportation of passengers for compensation. You can be a for-hire passenger carrier regardless of whether:

1. you are compensated directly or indirectly for the transportation service provided;
2. the compensation is paid or not paid by the passengers; or
3. you have a non-profit status.

If you are operating a motor vehicle in interstate commerce as a for-hire motor carrier of passengers, you must obtain operating authority registration unless you operate within a commercial zone or are otherwise exempted. For on-line operating authority registration, go to <http://www.fmcsa.dot.gov/registration>.

This brochure is intended to provide a general overview of the financial responsibility (insurance) requirements and the operating authority registration requirements. Please consult 49 CFR Parts 365, 372, and 387, and 49 USC Chapters 135 and 139 for specific information.

## ADDITIONAL INFORMATION

Educational and technical assistance can be obtained from the FMCSA's website at [www.fmcsa.dot.gov](http://www.fmcsa.dot.gov). An interactive informational guide called "The Motor Carrier Safety Planner" is available on this website. Any person seeking additional assistance should contact the closest FMCSA field office.

This brochure is only intended to provide general regulatory information for passenger operations. It is not intended to be a substitute for the Federal Motor Carrier Safety Regulations.

# Interstate 9 to 15 Passenger Vehicles: Overview of Federal Requirements

## OVERVIEW OF SAFETY REGULATIONS

The Federal Motor Carrier Safety Administration (FMCSA) has safety regulatory oversight responsibility for commercial van operations and for-hire operators of small passenger-carrying vehicles that engage in interstate commerce. Motor carriers are subject to safety regulatory oversight when their vehicles are used on a highway in interstate commerce to transport passengers, if the vehicle is designed or used to transport 9 to 15 passengers (including the driver) for compensation. The specific safety regulations applicable to such operations depend on the form of the compensation received by the transportation provider (i.e., in the form of either direct compensation or indirect compensation). Direct compensation means payment made to the motor carrier by the passengers or the individual acting on behalf of the passengers for the transportation services provided, and not included in a total package charge or other assessment for highway transportation services.

## DIRECT COMPENSATION

Motor carriers operating vehicles designed or used to transport 9 to 15 passengers (including the driver) for direct compensation, regardless of the distance traveled, are subject to the safety standards in Part 385 and Parts 390 through 396 of the Federal Motor Carrier Safety Regulations (FMCSRs). This type of motor carrier is required to register with FMCSA and mark its vehicles with (1) its USDOT identification number and (2) its legal name or a single trade name. To register for a USDOT identification number, go to <http://www.fmcsa.dot.gov/registration>.

In more detail, these carriers are subject to the safety fitness procedures and new entrant safety assurance procedures (Part 385); accident register recordkeeping (Section 390.15); driver qualification and medical examination requirements (Part 391); driver qualification files (Section 391.51); maximum driving time standards (Section 395.5); maintenance of records of duty status with Electronic Logging Devices (Part 395) or time records (for drivers covered by the short-haul exemption in Section 395.1(e)(1)); and vehicular inspection, repair, and maintenance and related recordkeeping (Part 396).

## INDIRECT COMPENSATION

Motor carriers operating vehicles designed or used to transport 9 to 15 passengers (including the driver) for indirect compensation, regardless of the distance traveled, are required to:

- Register with FMCSA
- Mark their vehicles with their motor carrier identification number (USDOT identification number)
- Maintain an accident register
- Comply with the prohibition against drivers texting while driving, and
- Comply with the driver use restrictions of cellular phones

To register for a USDOT identification number, go to <http://www.fmcsa.dot.gov/registration>. For more specific information about the regulations limiting the use of electronic devices, consult 49 CFR Part 392, Subpart H.

This brochure is intended to provide a general overview of the applicability of various parts of the FMCSRs. Please consult the parts of title 49 CFR listed above for more specific information
