Tips for Driving in Hazardous Weather

Make your plan to keep our roads safer, no matter the weather condition

After Your Route is Flooded
Avoid driving through flooded roadways and after your vehicle’s route if it’s unsafe.

Weather conditions, road conditions, visibility, and traffic.

It is necessary to slow down in hazardous weather. Adjust your vehicle’s speed and following distance to appropriately match weather and road conditions.

Large trucks and buses have long stopping distances, and in rain, snow, or ice, those become even longer.

Maintain a Slower Speed

Turning requires extra care when roads are wet or icy.

Make Careful Wide Turns

Be aware of longer stopping distances.
