

Motor Carrier Safety Advisory Committee (MCSAC)

Task Statement 23-2: FMCSA Strategic Plan Development

I. Task Title

Provide recommendations to FMCSA regarding the development of its 2024 – 2027 strategic plan.

II. Background

FMCSA's new strategic plan will align with the Department of Transportation's (DOT) Strategic Plan in accordance with Government Performance and Results Act Modernization Act (GPRAMA, Pub. L. 111-352) requirements and with DOT's strategic safety goals. MCSAC has provided assistance on FMCSA's past strategic plans. For this new plan, we ask that you consider past achievements and help us chart a course for maximum impact on safety improvements.

III. Task

FMCSA requests that MCSAC review our proposed goals for the new strategic plan, identifying areas that need refinement, realignment, or refocus in view of current and future safety goals. Specifically, we ask MCSAC to identify which programs and safety initiatives should be our focus over the next 4 years. We ask that MCSAC provide data, where available, and consider information identified by public commenters during the meeting.

IV. Estimated Time to Complete Task

MCSAC should develop its recommendations to the Agency on Task 23-2 at its June 2023 meeting and submit a letter report to the Administrator by July 31, 2023.

V. FMCSA Technical Representative

Kimberly Lambert, Chief, Strategic Planning and Program Evaluation Division,
