Annual Report Form (Class I & Class II Motor Carriers of Property and Household Goods)

Worksheet for Calculating Carrier Classification

What is this about?

This is to help you determine your carrier classification, which affects the reporting requirements of Form M.

Carrier classification and reporting requirements

Motor carriers of property are classified based on their adjusted annual operating revenue. Carrier classification, in turn, determines what reports are required by FMCSA. We are providing the worksheet below for your convenience to help you calculate your carrier classification. If your classification has changed or is incorrect, please contact us. We will make any necessary adjustments and give you further instructions on any filing requirements.

Classification	Adjusted Annual Operating Revenue	Report Required by Law
Class I	\$10 million or greater	Form M.
Class II	Greater than \$3 million but less than \$10 million	Form M.
Class III	Less than \$3 million	None. Do not complete Form M.

How to calculate your carrier classification

Upward and downward classification will be effective as of January 1 of the year immediately following the **third consecutive year** that your revenue qualifies. The steps in calculating your carrier classification are as follows:

1. Calculate your annual operating revenues. This is revenue from the transportation of property in *interstate* and *intrastate* service while operating as a **common** and/or **contract** carrier.
This includes:
 - line haul and pickup and delivery services
 - revenues received under all operating authorities (regulated and unregulated)
 - revenues from your portion of interline shipments
 - revenues from local cartage service
 - revenues received from any other motor carriers for lease of your operating rights and operating equipment
 - commissions received for performing brokerage services**This excludes:**
 - revenues from private carriage, compensated inter-corporate hauling, and leasing vehicles with drivers to private carriers
 - revenues from non-trucking activities
2. Multiply this figure by the revenue deflator. In Table 1 below, FMCSA has calculated the revenue deflator for you. The revenue deflator is the 1994 monthly average of the producer price index of finished goods (PPI) divided by the revenue year's monthly average PPI, as shown in Table 1.
3. Table 3 is an example calculation. In this calculation, this carrier would be classified as Class II because for the last three consecutive years the Adjusted Annual Operating revenue was greater than \$3 million, but less than \$10 million. For example, if the 2020 revenue was less than \$3 million, then the carrier would be re-classified as Class III.

Table 1

Year	Annual Operating Revenue (a)	Revenue Deflator (b)	Adjusted Annual Operating Revenue (c) = (a) × (b)
2022	\$	0.50	\$
2021	\$	0.57	\$
2020	\$	0.62	\$
2019	\$	0.61	\$

The formula for Adjusted Annual Operating Revenues is as follows: Current Year's Annual Operating Revenues (a) x Revenue Deflator (b) = Adjusted Annual Operating Revenues (c). The formula is provided in U.S. Code 49 CFR § 369.2 Classification of carriers-for-hire, non-exempt motor carriers of property, household goods carriers, and dual property carriers.

Table 2

Year	Producer Price Index (PPI)	Revenue Deflator
1994	125.50	1.00
...	...	...
2022	250.95	0.50
2021	221.05	0.57
2020	202.88	0.62
2019	205.74	0.61

The formula for the Revenue Deflator is as follows: 1994 average producer price index of finished goods (PPI) divided by the revenue year's average PPI. For example, the monthly average PPI for 2022 is 250.95 divided by the 1994 PPI of 125.50. This is equal to the deflator value of 0.50. The formula is provided in U.S. Code 49 CFR § 369.2 (Classification of carriers-for-hire, non-exempt motor carriers of property, household goods carriers, and dual property carriers). PPI monthly values from 1994 and 2019 to 2022 are from Department of Labor, Producer Price Index by Commodity for Final Demand: Finished Goods (Source: <https://www.bls.gov/ppi>).

Table 3

Year	Annual Operating Revenue (a)	Revenue Deflator (b)	Adjusted Annual Operating Revenue (c) = (a) × (b)
2022	\$8,707,295.52	0.50	\$4,353,647.76
2021	\$7,915,723.20	0.57	\$4,511,962.22
2020	\$6,596,436.00	0.62	\$4,089,790.32
2019	\$5,996,760.00	0.61	\$3,658,023.60

Annual Report Form (Class I & Class II Motor Carriers of Property and Household Goods)

INSTRUCTIONS for FORM M

A completed **Annual Report Form M** is required of all for-hire Class I and Class II motor carriers of property or household goods that have revenues for three consecutive years exceeding \$3 million dollars (adjusted over base year 1994 by revenue deflators). The governing regulations are in [49 CFR 369](#). The data collected is used by carriers, shippers, federal agencies, and industry analysts to measure the economic health and operating characteristics of the motor carrier industry.

SECTION A

Motor Carrier Number (or MC number) — the docket number assigned by the former Interstate Commerce Commission, in the granting of operating authority to the carrier. Operating authority provided a defined listing of the commodities allowed and the geographic territory within which carriers were allowed to operate.

U.S. DOT Number — The number assigned by the U.S. Department of Transportation Federal Motor Carrier Safety Administration (formerly an office of Federal Highway Administration), upon verification that carrier has acquired proper bodily injury, property damage liability, and cargo liability insurance, in compliance with the governing statutes.

Base State — The state in which a carrier is registered for fuel tax reporting purposes, also known as the Unified Carrier Registration System (UCRS) state. If not part of the UCRS, then the state where the company is headquartered or does the majority of their business.

Base State Registration Number — The number assigned to the carrier for fuel tax reporting purposes by the base state, or the Unified Carrier Registration System number.

Reporting carrier and affiliate(s) — All motor carrier data captured in the Annual Report can be reported on a consolidated basis, consisting of the data of the parent company and all related operating affiliates. The parent or reporting carrier is defined as the highest ranking carrier in the consolidated group. Affiliate motor carriers which maintain their own accounting systems, may file independent reports apart from the parent company. The purpose of the consolidated financial statement is to capture the financial and operating data for the parent and affiliates as if the group were a single company. Companies, which can be included, are those which comprise an integral part of the respondent carrier's operations and whose purpose is to provide transportation service or is supportive to such activity. Affiliates, which comprise integral parts of the carriers operation, are defined as:

- any carrier or non-carrier holding company, which is exclusively engaged in providing motor carrier transportation service and controls, through majority stock ownership, one or more carriers.
- any carrier subsidiary which is majority owned and controlled by its carrier parent and whose purpose and operations are supportive to the transportation operations of its parent.
- any carrier affiliate under common control with the respondent carrier and whose express purpose and operations are supportive to the transportation operations of the respondent carrier.

Not to be included in the report are non-trucking related affiliates such as banks, insurance companies, etc., or affiliated motor carriers, which are subject to regulatory control in another country.

SECTION B

Revenue Commodity Group — Identify the type of operation by the category, which comprises the majority of company revenues. Select one of the following three categories:

- General Freight — Miscellaneous commodities generally not requiring special handling or revenue equipment.
- Household Goods
- Specialty Freight — freight requiring special handling and/or revenue equipment.

NOTE: If the **General Freight** carrier group is selected, then choose one of the four given categories (Less Truckload, Truckload, Parcel or Container). If **Specialty Freight** carrier group is chosen, choose up to "3" sub-categories that define the majority of your operation.

You may attach documents that contain the information listed in the forms, instead of filling in the form

Ordinary Income or Loss before taxes (line 238), Ordinary Income or Loss after taxes (line 240), and Net Income or Loss (line 242) are calculated by the addition of line 235, and the subtraction of lines 236, 237, 239 and 241. The values entered in lines 236, 237, 239 and 241 should be stated on the form as positive numbers, unless the effect of these accounts is to increase net income (or reduce net loss), in which case they should be stated as negative (or bracketed) numbers.
