**Note for Windshield Obstruction Exemptions:** On September 23, 2016, in response to Section 5301 of the Fixing America's Surface Transportation (FAST) Act, the Federal Motor Carrier Safety Administration (FMCSA) published a final rule amending 49 CFR 393.60(e) to allow certain devices that utilize "vehicle safety technology" to be mounted on the windshield of commercial motor vehicles (see 81 FR 65568). In addition, the Act required FMCSA to allow the use of all devices for which limited 2-year exemptions had previously been granted and in effect on the date of enactment of the Act. As such, the regulatory

amendments made in the September 2016 final rule effectively eliminate the need for the windshield obstruction temporary exemptions previously listed in this table; therefore, they have been removed.
