INSTRUCTIONS FOR ONLINE REPORTING OF DOT FMCSA DRUG AND ALCOHOL TESTING RESULTS

The Federal Motor Carrier Safety Administration (FMCSA) collects drug and alcohol testing results in order to quantify the incidence of drug and alcohol abuse in the commercial motor vehicle industry; this data is used to determine FMCSA's random drug and alcohol testing rates for the next year.

Each year FMCSA collects data from a random sample of companies with fewer than 1,000 drivers, and from all companies with 1,000 or more drivers.

FMCSA notifies companies of reporting requirements by email (and physical mail if email bounces back undeliverable). Your notification includes a username and password that allows you to complete the required summary report online (or using a downloadable form). All interstate and intrastate commercial motor vehicle operators (including owner-operators) are required to participate in a U.S. Department of Transportation (DOT) drug and alcohol program.

You must complete your report or provide the appropriate response to the notification by March 15, 2016.

Note: If you encounter technical problems with the site, please call 617-494-6336.

Log on to https://damis.dot.gov by entering the user name and password provided in your notification; then select “enter data”.

2. INSTRUCTIONS FOR ONLINE REPORTING OF DOT FMCSA DRUG AND ALCOHOL TESTING RESULTS

1. Enter your company’s name, “doing business as” name (if applicable), address, and email.

2. Enter the name and complete telephone number of the company official certifying the accuracy of the report and the date that the person certified the report. The company official cannot be a service agent (e.g., representative of a consortium or third party administrator). A service agent can prepare the report, but a company official (e.g., safety officer or other authorized company representative) must certify the accuracy of the report by submitting it.

3. If someone other than the certifying official completed the D&A testing form, enter that person’s name and phone number.

4. If you use a Consortium/Third Party Administrator (C/TPA), please enter the name and phone number.

5. Please verify FMCSA is typed in. This may be auto-filled.

6. Please enter your company’s DOT#.

7. If you are the only employee at the company, please select “yes” for owner-operator. If you have more than one employee, please select “no”.

8. If you are operating vehicles that require CDLs on the public roads in intrastate or interstate commerce, please select “no” for exempt. In addition, an owner-operator is required to be registered in a consortium. (A consortium is a DOT random pool comprised of many different companies.) Please make sure you have the consortium name and phone number listed in the drug and alcohol testing report if you are an owner-operator.
3. INSTRUCTIONS FOR ONLINE REPORTING OF DOT FMCSA DRUG AND ALCOHOL TESTING RESULTS

Instructions: Employer Section

Safety sensitive categories are job positions that require participation in a drug and alcohol testing program. FMCSA has only one safety-sensitive category, which is "drivers". Anybody that operates a vehicle that requires a commercial driver’s license on public roads in intrastate or interstate commerce, including a part-time or occasional employee, is considered a driver. For example, if the number of drivers varied for your company during 2015, you will need to calculate the average number of positions throughout the year.

A selection period reflects how often a motor carrier conducts random draws among drivers for testing – typically monthly or quarterly. If you conduct quarterly random draws, you would need to determine the number of drivers in your company during each quarter. For example, if your company had 30 drivers in quarter 1, 20 drivers in quarter 2, 40 drivers in quarter 3, and 25 drivers in quarter 4, you would divide the total of 115 drivers by 4 – resulting in an average of 28.75. Always round up the average results. Therefore, in this instance, the average number of driving positions to be entered is 29.

If you conduct monthly random draws (or more frequent random draws), add the total number of drivers for all selection periods, and then divide by the number of selection periods to get the average number of drivers. Thus, for monthly random draws, you would add all drivers, and then divide by 12 for the average number of drivers.

Enter the total (or total average) number of drivers.

Enter the total (or total average) number of drivers again.
4. Instructions for Online Reporting of DOT FMCSA Drug and Alcohol Testing Results

**Instructions: Drug Testing Data Section**

1. Pre-employment testing (column 1). This column is the total for columns 2-12; the system will complete it automatically, so skip to column 2 to begin entering data.

2. In column 2, enter the number of verified negative results.

3. In column 3, enter the number of positive results.

4. If your company had any positive test results, you must enter the totals in columns 4 through 8 for each drug for which DOT requires testing (e.g., Marijuana, Cocaine, etc.). Columns 4 through 8 must equal the value you entered in column 3. For example, if you indicated that you had 5 positive results, you must ensure that columns 4 through 8 add up to 5.

5. If there are zeros for all columns, please use the button at the bottom that will fill the remaining columns with zeros for this row. Please follow the same procedure for the remaining 5 columns (pertaining to refusals).

6. For column 11, enter the number of donors who did not provide an adequate specimen in 3 hours, and went through the Shy Bladder procedure, but were determined by the medical review officer to not have a valid medical condition that precluded giving an adequate specimen. This is considered a refusal per 49 CFR § 40.193 (d) (2) (i).

7. For column 12, enter the appropriate number of refusals, based on refusal information in 49 CFR § 382.107 and § 49 CFR 40.191. In addition, What Employers Need to Know about DOT Drug and Alcohol testing on pages 25 through 27, lists the deciding official for each refusal situation.
Instructions: Alcohol Testing Data Section

1. Pre-employment testing (column 1): this is the total for columns 2, 3, 7, and 8, and will be populated by the system. Skip to column 2 to begin entering data.

2. You must enter a number for columns 2 through 9.

3. If there are zeros for all these columns, please see the button at the bottom that will fill the remaining columns with zeros. Please follow the same procedures for the remaining 5 types of DOT alcohol tests.

4. For column 7, enter the number of refusals for Shy Lung, based on 49 CFR § 40.265 (B).

5. For column 8, enter the number of refusals, per 49 CFR § 40.261.
Instructions: Wrap Up Section

You will be prompted with an error notice to correct any problems with your submission.

Once your data makes it through data validation without errors, a dialog box will pop up, asking you to certify the results, provide your electronic signature, and submit your data. Then select the “okay” button to complete your report submission.

You will then get an option to receive an email confirmation of your completed submission. Click on the link to receive email confirmation.
