Legend:
- Expanded PRISM (green)
- Enhanced Participation (yellow)
- Full Participation (dark blue)
- Partial Participation (gray)
- No Participation (white)

◊ Real-time PWS for registration
* Retrieve suspended plates
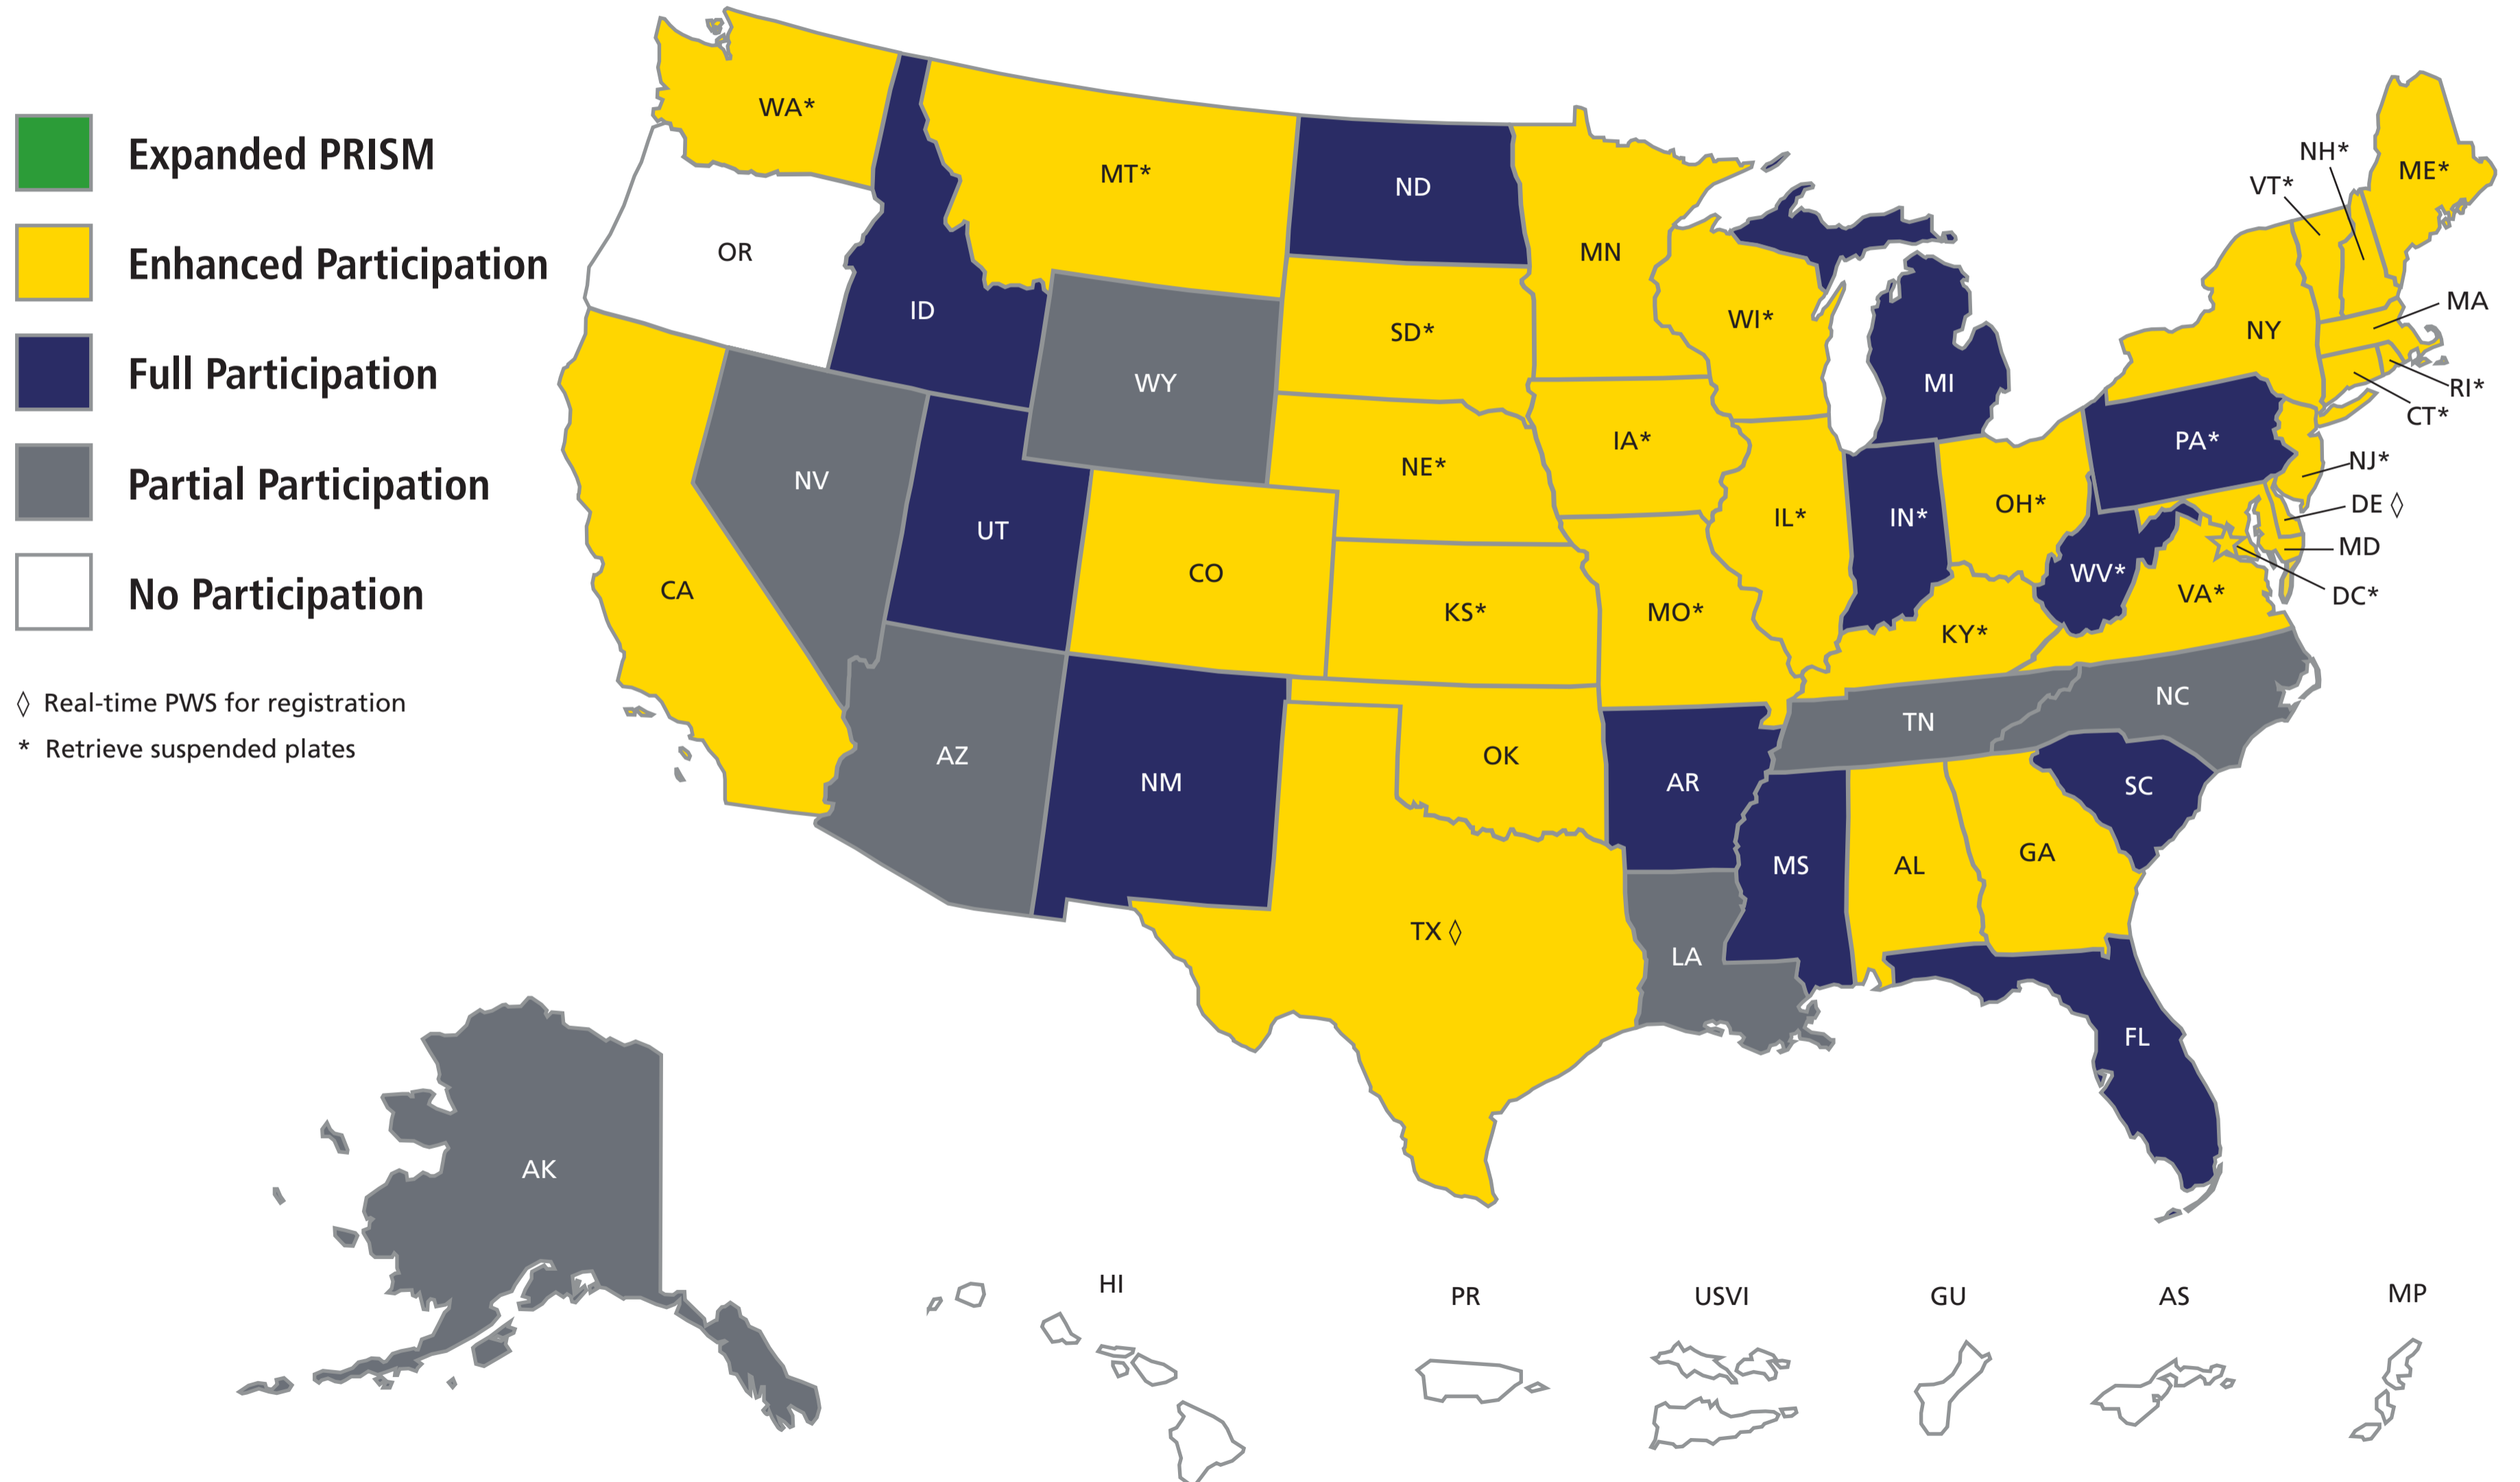

PRISM Implementation Summary

Expanded PRISM

- State meets all 12 PRISM implementation requirements
- Requirements are implemented by CMV registration agencies
- Focus on non-IRP vehicles or weighted between 10,001 to 26,000 lbs

Enhanced Participation

PRISM Implementation Requirements 7-12

7. Legislative or administrative authority to deny registration for reincarnated carriers

8. Check VIN against PRISM Target data for OOS affiliation

9. Implement a process to identify a reincarnated carrier

10. Deny registration for reincarnated carriers or request VIN removal from PRISM Target data

**11.** Set 950 status codes to suspend vehicles in SAFER

12. Certify PRISM cab card barcode

Full Participation

PRISM Implementation Requirements 1-6

1. Legislative or administrative authority to deny/suspend for carriers under Federal OOS

2. Collect/validate USDOT and TIN number of MCRS

3. Check OOS status before registration (Deny)

4. Check OOS status daily during registration (Suspend)

5. Upload vehicle registration information to SAFER

6. Report quarterly denials and suspensions

Partial Participation

- State does not meet all Full Participation requirements

Optional Program Enhancements

◊ Use real-time PRISM Web Services in addition to the daily Target and/or Census file(s) for registration application

* Retrieve license plates from motor carriers whose registration has been suspended due to Federal OOS order
