

Tips for CMV Drivers

1. Defense! Defense!

Commercial drivers have to be constantly vigilant to detect unexpected road conditions, distracted drivers, and motorists who don't understand how commercial vehicles operate.

Scan ahead about 15 seconds (a quarter mile on interstates, or one to two blocks in cities) for traffic issues, work zones, and other dangers. Check mirrors every 8-10 seconds to be aware of vehicles entering your blind spots.

2. Signal for Safety

Signal and brake to give other drivers plenty of time to notice your intent. If you must pull off the road, use flashers, reflective triangles, and road flares to alert approaching drivers.

3. Know When to Slow

Driving too fast for weather or road conditions or failing to slow down for curves or ramps create risks for spills and rollovers, as well as crashes.

4. Maintain Your Vehicle

Make sure pre-trip safety inspections are completed particularly for tires and brakes. Your life depends on them. Make sure your load is well balanced and secure, as a shifting load can cause a rollover or loss of control. Loose materials create road hazards.

5. Buckle Up

Use your safety belt every time. Safety belts save lives, reduce injuries, and allow drivers to stay inside and in control of their vehicles in case of a crash. In 2014, 30% of truck drivers involved in fatal crashes were partially or totally ejected from their vehicles.

6. Stay Sharp

Get enough rest – don't drive when you're fatigued, too ill to focus, or on medications (including over-the-counter medicine) that make you drowsy or dizzy.

7. Get the Right Information for Trip Planning

Stay up to date on weather, road conditions, detours and mountainous routes in order to plan driving time. Be aware that non-commercial navigation systems and apps may not provide warning of height and weight limitations and other commercial vehicle restrictions.

8. Practice Work Zone Safety

Work zones present many hazards, like lane shifts, sudden stops, uneven road surfaces, moving workers and equipment, and confused passenger vehicle drivers. In 2014, 30% of fatal work zone crashes involved at least one large truck compared to only 11% of all fatal crashes – so it's vital to

take work zone safety seriously. Slow down, maintain extra following space, and be prepared to stop. Obey all work zone signs and signals. Scan ahead for changing traffic patterns, and be alert to vehicles entering your blind spots. Keep a sharp eye out for road workers and flag crews.

9. Never Drive Distracted

Texting is among the worst driving distractions. The odds of being involved in a crash, near-crash, or unintentional lane deviation are 23.2 times greater for truck and bus drivers who are texting while driving. Research shows that drivers texting while driving took their eyes off the forward road for 4.6 seconds on average. At 55 mph, this equates to traveling 371 feet (more than the length of a football field) without looking at the road.

It is illegal for a commercial driver to text while driving, and there are restrictions on using mobile phones (devices must be hands free, and dialed using no more than one button).

Eating, drinking, interacting with a navigational device, map reading, controlling a pet, or any other activity that takes focus off the road can also be a deadly distraction.

If you must attend to an activity other than driving, get off at the next exit or pullover – it’s not worth the risk.
